COMMUNITY REGIONAL MEDICAL CENTER

Background

Community Regional Medical Center began in 1897 with Celia Burnett who was a proprietor of a successful boarding house at the southeast corner of Fulton and Calaveras streets. Burnett joined forces with Fresno physicians to form a private hospital known as the Burnett Sanitarium. Today, Community Regional is the flagship of Community Medical Centers' three acute-care facilities, with 626 licensed beds and an average of 517 inpatients a day.

This academic-affiliated medical center is located on a 58-acre campus in downtown Fresno and has a full-service, 56,000-square-foot emergency department – one of the largest in California – and is home to the region's only comprehensive burn and Level I trauma centers. Specialty units include neuroscience, cardiovascular, orthopedic and women and children's services.

Community Regional is home to the area's only certified Primary Stroke Center and comprehensive neuroscience program. It also was the first Valley hospital to offer a revolutionary, minimally invasive heart surgery, as well as "Generation 4" CyberKnife – a non-invasive alternative to surgery for the treatment of both cancerous and non-cancerous tumors.

Leading the charge with the latest technology and facilities, Community Regional continues its commitment to meeting the Valley's health care needs. Hospital additions include a 52-bed Central California Neuroscience Institute, more than 100 beds dedicated to cardiovascular care, including a 50-bed unit with leading edge monitoring equipment and private rooms, and a 65-bed Level III neonatal intensive care unit for the most fragile newborns.

On the Community Regional campus, recent additions include a new six-story parking structure with more than 1,500 stalls, a four-story medical office building on the east side of campus, while the north end features the nearly 80,000 square-foot Deran Koligian Ambulatory Care Center. Terry's House, a home away from home for families of patients who receive critical care, also began construction in January 2010 at Fresno and R streets.

Each year more than 200 doctors from one of the nation's best medical schools receive specialized training at Community Regional through the UCSF Fresno Medical Education Program. Residencies and fellowships are offered in emergency medicine, cardiology and pulmonary medicine, orthopedics, general surgery, critical surgical care, obstetrics/gynecology, pediatrics, internal medicine, family practice, oral and maxillofacial surgery, general dentistry, pharmacy, wilderness medicine and psychiatry.

Patient services

- 24-hour emergency care
- Burn unit
- Cancer treatment
- Cardiovascular
- Critical care
- CyberKnife®
- da Vinci® Surgical System
- Dialysis
- Dietary and nutrition
- Endoscopy
- Family birthing
- General surgery
- High-risk pregnancy (antepartum) care
- Hyperbaric oxygen therapy
- Imaging/radiology
- Intensive care unit
- Laboratory
- Level 1 (highest level) trauma care
- Level III (highest level) neonatal intensive care
- Lung Nodule Program
- Mammography
- Medical/surgical
- Neuroscience
- Occupational, physical and speech therapies
- Orthopedics/Joint replacement
- Outpatient surgery
- Pediatrics
- Pharmacy
- Rehabilitation
- Residency/Fellowship programs
- Respiratory
- Telemetry/intensive care step-down
- UCSF Fresno Medical Education Program faculty
- Women and Children's services
