

Fact Sheet:

Fresno Heart & Surgical Hospital

Background

Fresno Heart & Surgical Hospital opened in north Fresno in 2003, as the Fresno Heart Hospital, solely providing cardiovascular surgery and procedures. It was initially designed to treat patients with cardiac and vascular needs. In 2006, services expanded to include bariatric and general surgery. Consistent with its mission to provide exceptional care, the hospital expanded to also include minimally invasive surgery.

The American Society for Metabolic and Bariatric Surgery also named Fresno Heart & Surgical a Center of Excellence.

Fresno Heart & Surgical expanded again in 2008, to add two specialty high-tech operating rooms and support service areas. The hospital's conference and education center is located on its first floor. The Advanced Diagnostic Testing Center was completed in 2012. It offers outpatient laboratory, imaging and endoscopy services.

Accreditation

Every three years, the Joint Commission inspects participating hospitals to gauge their quality of care. Fresno Heart & Surgical received full re-accreditation in 2017.
