

Fresno Heart & Surgical Hospital

FACT SHEET FISCAL YEAR 2025

Background

Fresno Heart & Surgical Hospital opened in north Fresno in 2003 as the Fresno Heart Hospital, solely providing cardiovascular surgery and procedures. It was initially designed to treat patients with cardiac and vascular needs. In 2006, services expanded to include bariatric and general surgery. Consistent with its mission to provide exceptional care, the hospital expanded to also include minimally invasive surgery.

Fresno Heart & Surgical Hospital expanded again in 2008 to add two specialty high-tech operating rooms and support service areas. The Advanced Diagnostic Testing Center, which offers outpatient laboratory, imaging and endoscopy services that support the hospital, was opened nearby in 2012. The hospital's conference and education center is located on the first floor.

Today, Fresno Heart & Surgical Hospital is a 48-bed specialty hospital known for its luxurious accommodations, excellent patient experience and top accolades for cardiac, vascular and bariatric surgery services. The hospital also offers restaurant-quality cuisine that caters to individual patient needs and tastes.

Metabolic and Bariatric Care

Fresno Heart & Surgical Hospital specializes in providing top-notch metabolic and bariatric care. The hospital's weight loss surgery program is one of the busiest in California. It ranks in the top 10% nationally for quality outcomes and has helped thousands of patients resolve diabetes, sleep apnea, GERD, hypertension and other health conditions. The program has earned accreditation by the American College of Surgeons and the American Society for Metabolic and Bariatric Surgery.

Cardiac and Cardiothoracic Care

With a reputation for providing outstanding quality and service, Fresno Heart & Surgical Hospital is known for offering exceptional overall cardiac and cardiothoracic care. With a world-class team of clinicians and physicians, these experts in their field use innovative techniques and state-of-the-art technologies to consistently provide patient outcomes that are better than state and national averages — with fewer complications, faster recoveries and shorter hospital stays.

Fresno Heart & Surgical Hospital is recognized for excellence in heart and vascular care, demonstrating the care team's dedication to providing high-quality, life-saving treatments. The hospital is recognized by Healthgrades as a five-star recipient for pulmonary care, heart and vascular care and critical care for diabetic emergencies and treatment of sepsis.
